

Interior Plywood Wall C

Bottom Beam Rests Directly on Deck

Note: Detail framing indicated in red is flush with the interior wall and uses 3/4" x 4 1/2" (1" x 5") Hinoki wood.

Note: Cross hatched detail framing is made with 3/4" x 2 1/2" (1" x 3") Hinoki wood and does not penetrate the inner wall. It is aligned flush with the exterior plane of the rest of the detail framing.

Note: 1/4" x 3/4" S4S molding can be substituted for the cross hatched portion of the framing for the Fold Up Window. All other cross hatched framing in this drawing is structural.
